## News of Interest to Pass Shoppers in Every Issue

DURING the next twenty-four days this paper will publish advertisements of interest to buyers of Coleman and the Crows Nest Pass district. The public should take note and make as many of their purchases as possible from Coleman stores, for there are hundreds of articles on sale in Coleman stores to enable a satisfactory selection to be made for gifts. Remember the local stores serve you not only at Christmas time with needed goods at competitive prices, but are here the year round as well to supply your needs. Help to make it a more prosperous centre by buying in Coleman.

### Fine Decorative Work on Church Interior

"A thing of beauty is a joy to behold" aptly describes the interior of Holy Ghost church, which has just recently been redecorated. The work was done by Contractor D'Appolonia and painter George Graham.

Contractor D'Appolonia designed both ceiling and walls, the latter along gothic lines to harmonize with the gothic windows. George Graham with his gift for harmonizing colors has brought out the full beauty of the designer's work and members can well be proud of the interior of their church.

### White Lunch Re-Opening Under Mrs. E. Ledieu

The White Lunch will be re-opened on Monday under the proprietorship of Mrs. E. Ledieu, and a special menu will be provided for the opening. You will find a finely renovated lunch room and counter, with the best of cooking that you'll enjoy.

### Flowers From Table Mountain, South Africa

L. G. Llewellyn received several stalks of a flower native to South Africa, named Chinchies, which were picked on Table Mountain and forwarded by an old friend of the Llewellyns, whom they knew in South Africa. The lady sent them to be placed on Mrs. Llewellyn's grave. They were picked on Oct. 20, forwarded by mail steamer to Southampton and thence across the Atlantic, arriving here with blooms opening up in fine condition. It was a kindly remembrance sincerely appreciated by Mr. Llewellyn.

Blairmore Anglican Guild raised over \$240 at a bazaar held last week.

### Front Page for Janet Gillespie

Rendered First Aid to Keep Tiny Spark of Life in World's Tiniest Baby of 22 Ounces

A former Coleman girl, daughter of Mr. and Mrs. Dave Gillespie, night superintendent at Drumheller hospital, had widespread newspaper publicity thrust unwittingly upon her as the nurse to welcome into this terrestrial sphere the world's tiniest baby on record.

Unfortunately it lived for only six days, though this is considered extraordinary for such a premature birth. The baby, whose brief career was recorded every day by radio from coast to coast, was the child of Mr. and Mrs. James Carruthers of the mining population of Drumheller.

She was born 45 minutes after midnight last Sunday, and died on Saturday evening, having been kept alive in a home-made incubator at the hospital.

The story of Nurse Gillespie's part in caring for the baby can not be better described than told by Margaret Ecker in a front-page story of Saturday's Calgary Herald:

"Nurse Janet Gillespie is the first to handle the baby" said one of the nurses. "It was she who noticed that it was breathing. We wrapped it in absorbent cotton and put it near a heater until we got the incubator. None of us thought that it would live through the night. All night long, every hour, we gave it drops of diluted brandy. Even the doctor, when he saw it, didn't think it would live."

"When I first saw her," Nurse Janet Gillespie went on, "the cord was still around her neck and the membranes were still over her head. They call that a cowl, don't they? It's supposed to be lucky. I hope it is for Betty Lou...that's what her mother says she's going to call her. We called her Molly Alice at first."

With the story was published a front-page layout five columns wide showing the photographs of the mother, Nurse Gillespie and Alice Smith, and the baby in the incubator.

Chain store competition is merciless in its methods and does nothing towards community building. Buy from your independent store owners, who are part of your community.

Miss Norma Plante, R.N. left on Sunday morning to resume her duties as nurse at Queenel, B.C. She has spent the past three weeks the guest of her parents, Mr. and Mrs. J. E. Plante.

Richard Bennett, son of Mr. and Mrs. H. M. Bennett of Blairmore, will leave next week for England, to commence duty in the Royal Air Force. He is graduated from Blairmore high school.

George Short, who was on McGillivray office staff from 1916 till 1928, and later went to Vancouver, came back to the Pass this week and is now with Sartoris Lumber Co. at Blairmore. His wife and children will remain at Vancouver for the present. George is well remembered here and old acquaintances will extend the hand of welcome.

### Local News

Born—To Mr. and Mrs. James Joyce on Tuesday evening, a son.

The A.Y.P.A. of St. Albans' parish held a whist drive last evening in the parish hall.

At times the slowness of response at the telephone exchange reminds one of "the Toonerville trolley."

Mr. and Mrs. William Wilson travelled to Calgary on Friday last where they attended the funeral of a friend.

Mr. A. E. Knowles has been appointed process issuer in town of Coleman, succeeding Mr. James Ford.

Constable Ernest F. J. Bowell, R.C.M.P., Blairmore, has been transferred to Regina, after several months duty in the district.

The three Ritz Brothers, Hollywood's dizzietri, play the leading roles in "Kentucky Moonshine" which comes to the Palace this weekend.

### A Letter From Toronto

Mr. and Mrs. Alex Beck this week received a letter from Mrs. Marion Hodgson, daughter of Mrs. James Scott, widow of the late James Scott, for many years master mechanic at International mine. Mrs. Scott is considerably improved in health, and is able to be out on the porch in fine weather. Her address is 226 St. George Street, Toronto, and Mrs. Hodgson wishes to convey her good wishes to all old friends and acquaintances in Coleman, and would appreciate hearing from them at any time.

### In Memoriam

IN LOVING MEMORY of our dear daughter, Estelle, who passed away on Sept. 3, 1938.

Loved and ever remembered by Mother, Father, Sisters and Brothers.—Inserted by Mr. and Mrs. George Lewis, Coleman.

### Curling Season Started Here Saturday

Local curlers threw their first rock of the new season on Saturday evening when two rinks were formed to play a friendly game. On Sunday a club meeting was held and skips elected. It will be the duty of all skips to fill their rinks as much as possible by to-night (Thursday) and hand the names to the secretary. Another meeting will be held this Sunday at 1:30 p.m. at the arena when the season's activities will be planned and committees elected to arrange schedules, bonspiels, etc.

This week it is "open house" at the arena. The club will be open to all men and women who would like to play one or two games before deciding whether they will become members or not. The only request asked of them is that they bring their own curling broom.

Names of 23 ladies have been secured for the ladies' league and on Sunday a meeting will be held to organize a league. Mixed bonspiels will be held at Christmas and New Year. During this week experienced curlers will show the ladies the finer points of the game, so that they may be better able to enjoy the sport when the league is organized.

Blairmore curlers lost no time upon hearing that Coleman arena was open and a rink came up from that town on Sunday evening for a game.

### The Churches

ST. ALBANS' CHURCH

J. R. Hague, Incumbent.  
11 a.m., Holy Communion. Celebrant and preacher, Rev. H. Priest.

2 p.m., Sunday school.

Read 1. Corinthians 12:1-13

On Ember Day we should especially pray for our clergy, those ordained and those about to be ordained.

We call this work the ministry, but ought we to call it the ministry? The clergyman should be expected to unite in his person the manifold powers needed for ministry to a community.

With whom shall it be found?

With the man who is fit for the congregation.

The Rector is the father and the father of his people.

His work is to draw out, recognize, encourage, set to work and consecrate as one whole the differing abilities of his people.

Five children will exhibit in one family five different aptitudes: one (like Joseph) is a dreamer, another is a craftsman, another is the music housekeeper, another is all for athletic sports. The parents marvel over the variety of their children.

With one child from one child is never expected from another. One complements the other. They are a delightful, interesting family. The church is a family of families.

CHURCH OF THE NARAZENE

Services: Sunday school at 11 a.m. Classes for all ages. Morning worship at 12 noon. Communion service was postponed from last Sunday to this Sunday. Evangelistic service at 7:30 p.m.

Tuesday at 7:30 p.m., Bible study; lesson from Book of Nehemiah.

Friday at 7:30 p.m., Prayer and praise meeting.

The Sunday school children are urged to come to practice for their Christmas music on Tuesday and Friday evenings after school.

Strangers and visitors are always welcome.

Dec. 11 will be Family Day in the Sunday school.

THE SALVATION ARMY

Capt. and Mrs. Fred Hewitt, officers in charge.

Services of the Week

Sunday: 10:30 a.m., Children's directory studies;

2:30 p.m., Sunday school;

7:30 p.m., Evening service;

Tues.: 7:30 p.m., Home league, ladies' meeting.

Wed.: 7:00 p.m., Boys' band practice.

Thurs.: 7:00 p.m., Singing company practice.

Friday: 7:30 p.m., Band practice.

### Premier Aberhart Goes to Ottawa for Financial Aid

Edmonton, Nov. 28.—Possibility that the present trip of Premier William Aberhart and Provincial Treasurer Solon E. Low to the east may be followed by a repudiation of the Alberta government's policies to date on the morning of its financial obligations, was seen here this week by political observers.

It is known that although ostensibly the government has been encouraged to do what it can do to affect a refunding of the province's \$157,000,000 public debt, Aberhart will discover that he cannot get funds without the support of the Dominion government, and so take advantage of the fact that the Canadian government insisted that Low should go. Whatever the truth of that, it is known that the last day to which he practically had to go, was yesterday.

It is known that although ostensibly the government has been encouraged to do what it can do to affect a refunding of the province's \$157,000,000 public debt, Aberhart will discover that he cannot get funds without the support of the Dominion government, and so take advantage of the fact that the Canadian government insisted that Low should go.

Proof of the desire of chartered banks to co-operate with the government as far as they possibly can under the law and the rules of practicability was given last week in the announcement, which came first from within the government itself, that the clearing houses operated by the government's treasury branches, also known as "credit houses," to associate membership, thus providing the means by which depositors in the treasury branches, for instance, are finding it extremely difficult to carry on financially in view of the high rates which have been charged by the government.

It is known that some of these—reputedly Social Credit "experts" L. D. Byrne among them—have told the government that some means must be found to undo the harm that has been done.

And it is believed that Aberhart now is seeking some way of reversing his policy and re-establishing full interest on the public debt while at the same time saving his own face and that of his government.

The way of doing it, said one man in the centre of the political world, is to get the clearing houses to shoulder the burden of the decision on the shoulders of the people at large by seeking a new mandate, telling them that refunding at low rates is possible if they will accept the terms of his contractual obligations, and asking them whether that should be done.

Such a political policy, of course, would have to be accompanied by attacks on the federal government and the provincial government, and application, and that application was endorsed immediately when the executive met in Montreal. In the case of the clearing houses, the constitution of the clearing house, the mandate given to the clearing house, which would have forbidden associate membership, but the members quickly passed an amendment to the constitution to admit the clearing house.

Politicians, however, have been in their own interests than are politicians, the banks said nothing about the arrangement until the government itself made it known.

## A Dwindling Asset

Disconcerting, to say the least, are the latest official figures of automobile tourist traffic across the international boundary between the United States and Canada.

With agriculture in the doldrums the people in this country have been watching with interest and some measure of comfort the growth of the American tourist traffic in Canada. Seeing it as a busy young industry which gave promise of making up for some of the losses sustained by agriculture, if not immediately, at any rate in the near future.

The tide of tourist traffic Canada-ward from the United States has been flowing strongly across the international border in recent years and has been growing with remarkable acceleration until the trade has assumed the rank of the second largest industry of this country.

While, of course, the major portion of this comparatively new industry has to date been enjoyed by the provinces of Ontario and Quebec in the east and British Columbia in the west, due principally to their geographic proximity to American centres of dense popularity, still the prairie provinces have been reaping a modicum of benefit and enjoying some measure of the increase until now.

### The Wrong Direction

Now, however, it would appear that the pendulum is showing a marked tendency to swing the other way, since official figures for the month of September not only show a reduction of American tourist automobiles coming into Canada but an increase in the number of Canadian tourist cars going into the United States for periods long enough to place them in the tourist category.

In other words, the September figures demonstrate that the number of American visitors to this country, and hence the amount of money they are spending here, is declining, while the number of Canadians who are spending their time and money in search of pleasure on the other side of the line is showing an upward trend.

The September figures show that in that month approximately 6,000 more Canadian cars were admitted into the United States "for touring purposes" than in the corresponding month of 1937, while a decrease of 23,158 in the number of American cars entering Canada for periods ranging from 48 hours to 60 days is recorded. The latter is a substantial figure when based on a total entry of 174,637 American cars for the month of September.

While over the Dominion as a whole American cars entering Canada outnumber Canadian tourist cars travelling southward by five to one, entries across the boundary along the prairie provinces, in either direction, show a balance on the wrong side, if the September figures are any criterion of the entire summer movement, and there is no reason to suppose they are not.

The figures show that during September a total of 6,476 Canadian tourist cars travelled south across the boundary while only 4,617 northbound tourist automobiles passed through prairie customs ports, roughly a ratio of three to two on the wrong side of the economic ledger.

This appears serious enough when the figures demonstrate that for every two Americans spending money in the prairie provinces for gas and oil, meals and accommodation three prairie Canadians are spending cash for similar services in the United States, but that is not the whole story, for further statistics show that Canadians are spending considerable sums for the purchase of commodities in the United States and bringing them back under the \$100 per day exemption clause, spending a further loss to business on the Canadian prairies.

During the six months ending September 30, Canadian tourists returning to this country brought into Canada under the duty free exemption merchandise valued at approximately \$3,000,000 of which \$4,553,050 was spent in the States. Nearly half that amount went in clothing and a round half million each was spent for household appliances and boots and shoes. Another \$350,000 was exchanged for radios and nearly \$135,000 for auto tires, tubes and accessories with a further \$83,000 for miscellaneous commodities.

### The Obvious Remedy

The cause for this situation is not far to seek, when a comparison is made between the condition of the highways in the prairie provinces during the past few years with those in the Western United States. It is not surprising to find that American tourists in increasing numbers decide to do their travelling on their own side of the boundary and that Canadians in the west in increasing numbers travel south to escape their own bad roads and travel over the smooth highways which are to be found in the western U.S.A. Add to this the incentive to save a little money or to at least pay the cost of a two or three day pleasure trip on the savings made on one hundred dollars' worth of purchases, and surprise that Western Canadians are crossing the border in increasing numbers should disappear.

The obvious remedy, of course, is to rehabilitate the disintegrating highways in the prairie provinces and to build more, and perhaps some reduction in the tariff on some of the commodities which are purchasable at a saving on the other side of the line to bring prices into closer parity, would help to restore the flow of tourist traffic from the south and stem the southward tide of Canadian tourists.

Had some of the \$120,000,000 which has been spent on relief been expended on roads, work would have been found for many who have been more or less idle for years and the taxpayers would have had at least a partially self-liquidating asset in return for some of the expenditure.

### Firemen Had Alibi

Volunteer firemen did not respond when the fire siren sounded at Hart, Mich., as J. D. Luttrell's house burned down. Town officials demanded an explanation. "We thought the siren sounded to mark Armistice Day," firemen shamefacedly replied.

Ten rabbits will eat as much grass and pasture as one sheep.

### Other Worlds

#### Scientist Discusses Probability of Life On Sister Planets

Life probably once flourished on Mars but is "almost impossible" now, according to Dr. Spencer Jones, astronomer royal.

He said in a speech at Lecds, Eng., "It was the only other planet at all likely to support life and even there it could only be a primitive form."

Speaking of Mars, the astronomer royal declared "life probably flourished there millions of years ago but has been dried up by the atmosphere and has probably by now become almost impossible."

Atmosphere on Jupiter—a rocky planet about 22,000 miles in diameter—was so dense the pressure was equal to about 1,000,000 tons per square inch.

"We can't conceive of such a pressure," he said.

No oxygen had been detected on Venus but there was an enormous quantity of carbon dioxide around it. "Venus is a world," said Dr. Jones, "where life has probably not yet started or, if it has, exists only in very primitive form."

The Bible contains two chapters which are nearly alike, word for word. They are the 19th chapter of II. Kings and the 37th chapter of Isaiah.

Japan has banned the production and distribution of electric fans and refrigerators except when needed for the essential industries.

### IT POURS CLEANLY for the two pound tin

It's free—write for one now

- Fits the special top of the 2 lbs. tin of Crown Brand, Lily White and Royal Syrups.
- Is easily cleaned and can be used over and over again.
- Pours without a drip.
- Provides means of accurate measurement.
- Makes the 2 lbs. tin an excellent table container.
- The protective cap provides a sanitary cover.

Tell the boys that portraits of famous hockey stars can still be obtained for \$1.00 each.

**CROWN BRAND CORN SYRUP**  
The Famous Energy Food  
THE CANADA STARCH CO., Limited, Montreal

Texas is inhabited by about 550 species of birds.

owner!"

1/2 lb. tin 75¢

In a jolly Christmas Wrapper

**OGDEN'S**  
FINE CUT

### Considered A Luxury

#### People In West Indies Eat Apples Only At Christmas

The Canadian trade commissioner at Trinidad has been reporting on apple consumption in the West Indies. Apparently it is not very large. Total imports amounted to only \$33,016 last year, two-thirds of them coming from Canada, but not from British Columbia, since they were imported in barrels.

The trade commissioner tells us that the West Indian people consume apples as a luxury and mostly at Christmas. The fruit is sold through "marchands" or negro women street vendors, who put down a deposit on a barrel and pay a little more daily as they withdraw it.

The description of the method of sale is a reminder that it was from his apple business selling costards or apples from his barrow—that the English costermonger got his name—Vancouver Province.

### SELECTED RECIPES

#### PINEAPPLE DELIGHT

1/4 cups cream  
1/2 cup pieced pineapple, cut small  
1/2 cups strawberries, cut small  
1/2 cup nuts, chopped  
1/2 Christies' Social Tea Biscuits, crumbled

Beat well and fold in pineapple, strawberries, nuts and biscuits and two-thirds of the crumbled biscuits. Put mixture into six individual sherbet glasses and sprinkle with remaining crumbs. Six portions.

#### JIFFY MAYONNAISE

1 egg  
2 tablespoons Crown Brand Corn Syrup  
1/2 teaspoon salt  
1/2 cup dry mustard  
1/2 teaspoon paprika  
1/2 cup vinegar  
1/2 cup Mazola  
1/2 cup Benson's or Canada Corn oil  
1/2 cup cold water

Method: Put the egg, Crown Brand Syrup, vinegar and Mazola in a bowl but do not stir. Make a paste by mixing Corn Starch with cold water; add this to the egg and cold water; beat well but not necessary. Add the Corn Starch mixture to ingredients in mixing bowl and beat with dover beater. It thickens and combines (Yield 1 pint).

In some cases counterfeit money in Great Britain has been found to contain more silver than the money issued by the Royal Mint.

It is a mistake to eat all you can afford all you have, tell all you know or show all you feel.

### MUSCULAR RHEUMATIC PAINS—ACHES

It takes more than "just a salve" to bring relief. It takes a "counter-irritant" like good Musterole. It relieves, sooths, stimulates and helps in quickly overcoming the local congestion and pain when rubs on the aching area.

Musterole relieves soreness and stiffness generally and quickly.

Better than the old-fashioned mustard plaster, Musterole has been recommended by many doctors and nurses. Made in Canada, in three strengths: Regular, Children's (child), and Extra Strong. All druggists, 40¢ each.

**MUSTEROLE**  
BETTER THAN A MUSTARD PLASTER  
40¢ EACH

### Building Projects

#### Western Canada Showing Interest In Building Homes

Western Canada has shown considerable interest in building homes with the aid of the National Housing Act, according to J. Clark Reilly, secretary of the Canadian Construction Association, after a trip to the West coast.

"British Columbia is showing quite a bit of activity in housing," said Mr. Reilly in an interview. "The west coast province was slow to take advantage of the act, but now building is proceeding with ready co-operation from the insurance companies who are making the loans necessary for construction."

Considerable use of the Housing Act was being made on the Prairies, he said. Edmonton would vote shortly, he understood, on a project for construction of a block of low-rent homes by the city. Civic housing projects also had been discussed in Winnipeg.

"Personally, I favor formation of private companies to erect and administer such housing projects," said Mr. Reilly.

Housing will form a main topic of discussion at the 21st annual meeting of the Canadian Construction Association in Winnipeg next Jan. 10, 11 and 12, Mr. Reilly said.

### DRESSMAKER HAD TO QUIT SEWING

#### Hands Swollen With Rheumatism

Picture this poor dressmaker! Nine-tenths of her work consists of sewing—and she was not able to sew. When she sat in the chair was her trouble, and she failed any number of remedies. But nothing helped much—until she came to Kruschen.

"Three-and-a-half years ago," she writes, "I had a violent attack of rheumatic pains. My feet and hands were swollen. The pain was terrible. I was really quite crippled and helpless."

"I tried many remedies without success. Then I started on Kruschen Salts, and after one month, I could stand again. Then, I walked a mile in three weeks. I was quite well again. As I am a dressmaker, you can imagine what it meant to me not to be able to work. I am now back to work again, able to be able to walk, to work and to be free from pain."—MRS. E.S.

The stabbing pains of rheumatism and the aches and pains from the joints, Kruschen brings relief because it helps to dissolve those troubling crystals and to expel them from the system.

### New Magnetic Metal

#### Can Be Made To Shiver When Everything Else Is Hot

A new magnetic metal that can "shiver" and turn on the heat was announced at the Battelle Memorial Institute, Columbus, Ohio.

The shivering of this metal consists in losing its magnetism. It can be made to do this at any temperature from 150 below zero to 1,100 above.

This makes possible use of magnets of the new alloy for numerous automatic controls. Losing or regaining their magnetism, they operate electric switches.

They can be made to turn on the heat at 50, and shut it off when the temperature again rises. Unlike humans they can be fixed to "shiver" when everything else is burning up.

They will turn on a fan at 90, start a fire under a sand and fire control refrigerator and air conditioning. They will protect electrical machinery from overheating at any temperature up to red heat by "shivering" and shutting off the power.

#### Manitoba Farming Reduced

More than 1,000,000 acres of land have gone out of cultivation in Manitoba since 1921, Prof. J. H. Ellis, of the University of Manitoba, estimator in a report on soils in the province. Only 7,789,920 acres were under the plow in 1936, compared with 9,022,738 acres in 1921, he reports.

Venus travels an orbit that lies inside that of the earth. Therefore, when she is nearest us, she is directly in line with the sun and we can see only her dark side.

A certain fish found in the Great Barrier reef of Australia is armed with spines which contain a deadly poison capable of killing human beings.

"How did George break his leg?"

"Well, do you see those steps over there?"

"Yes."

"George didn't."

Official Canadian experimental farms are trying to develop a perennial wheat in an effort to do away with the labor of sowing every year.

For 2 Years Vick's Advertising has been passed upon by a Board of Physicians.

## MY NOSE IS CLEAR ALREADY

AFTER THIS, USE IT SOONER AND HELP PREVENT MANY A COLD FROM DEVELOPING

Here's specialized medication for nose and upper throat—where most colds start. Used at the first sniffle or sneeze—a few drops up each nostril—it helps to prevent the development of many colds... Even when your head is stopped-up, Vicks V-A-Tro-Nol helps clear the nose. It relieves clogged mucous, shrinks swollen membranes—lets you breathe again.

YOU CAN FEEL IT TINGLING MEDICATION GO WORK

Used in more homes than any other medication of its kind.

### Muskrat Restoration

#### Conservation Project In The Interests Of The Indian Population

Investigations into the possibilities of improving the production of muskrat are now being carried out in selected areas of the West, under the Department of Mines and Resources, Ottawa. Due to low water levels the muskrat has disappeared from many areas where formerly it was plentiful and the plains provide for much water control. A dam is being built about a mile and a half from the mouth of Murdoch Creek, which marks the initial step in the government's undertaking to re-establish the muskrat in this district.

Following a reconnaissance survey of the delta country north of the west end of Lake Athabasca and adjacent to the Upper Slave River, the Murdoch Creek drainage basin, comprising approximately 40,000 acres, was selected as being suitable for much an experiment. The country adjacent to Murdoch Creek is low, with many sloughs and marshes draining into the main stream and, therefore, only a comparatively small expenditure is required to establish water control. A dam is being built about a mile and a half from the mouth of Murdoch Creek, which marks the initial step in the government's undertaking to re-establish the muskrat in this district.

A dam is being built about a mile and a half from the mouth of Murdoch Creek, which marks the initial step in the government's undertaking to re-establish the muskrat in this district.

Following a reconnaissance survey of the delta country north of the west end of Lake Athabasca and adjacent to the Upper Slave River, the Murdoch Creek drainage basin, comprising approximately 40,000 acres, was selected as being suitable for much an experiment. The country adjacent to Murdoch Creek is low, with many sloughs and marshes draining into the main stream and, therefore, only a comparatively small expenditure is required to establish water control. A dam is being built about a mile and a half from the mouth of Murdoch Creek, which marks the initial step in the government's undertaking to re-establish the muskrat in this district.

## Current Comment on Local Events

GOING INTO DEBT, or charging up at the stores things that should be paid from current income, is a dangerous thing, for the buyer, and particularly for the seller. It leads to purchasing things that would not be purchased if the cash had to be paid at the time! If slack work or sickness comes along, a person in debt is plunged still further into the mire, while the storekeeper or creditor has no recourse. The moral is: Don't buy what you cannot pay for. You'll sleep much sounder at night, unless you're a deadbeat and don't care if debts are ever paid. In that case, the quicker every storekeeper gets wise, the better for themselves.

FIRST THINGS should be paid for, such as household necessities, required in daily living; taxes, rent, insurance and other incidental expenses. If you have something left over, it's your own business how you spend it. But until you pay for those things that enable you to live and have a shelter, to purchase things that might be termed luxuries and stalling of the grocer, the butcher, the taxes, etc., is just using money that belongs to others, which should be paid before other things are considered. Credit purchasing has placed many people in difficulties. Its judicious use has been a boon to those who use it wisely. But how many do? They overlook the essential fact that \$150 a year will not pay the expenses of \$2500, yet many year after year apparently try it—with one result, somebody gets stung, or the buyer is dispossessed of something he has purchased on a time-payment plan. The illustration cannot be more plainly emphasized than recalling the warning, "that if you earn a pound a week and spend nineteen and sixteen, you'll be happy; but if you spend one pound and sixteen a week, you will be forever sunk," or was it eternally damned? However, it doesn't matter; it amounts to the same thing.

IT'S DISGRACEFUL at times to learn how some beat their bills. One instance was drawn to the attention of the writer where a hardworking woman is still trying to collect a bill for about \$125 for goods and services, with little hope of success. It is instances such as these which lead to reprisals not strictly within the law on behalf of those who suffer the injury and loss.

RECENTLY a book of cartoons, reproductions of those which have appeared at intervals in the Calgary Herald, was published, causing many a hearty laugh. We took it home and spent part of Sunday morning enjoying it when possibly we should have been listening to the minister preaching love and goodwill to all men. However, there is much to be said for the cartoons. We all are prone to take ourselves too seriously. Looking over these pictures, it brought home the fact that there is always humor if you look on the bright side of life. Over three years ago Albertans, in the majority (not all) were stampeding to the polling booths in the hope that \$25 a month was to be handed out without working for it. Now the joke is on someone, and these pictures help to laugh off the deception which was imposed on the peo-

ple, and at the same time show that they should not take even Mr. Aberhart too seriously. In fact one newspaper writer even goes so far as to say that Mr. Aberhart should write a letter of thanks to the clever cartoonist for helping to relieve the tension and disappointment among the people over his failure to deliver his dividends and the many other promised benefits which have never shown the slightest indication of being fulfilled. If you still are not satisfied with laughs, get a book of "Rhymes on Aberhartia," recently published by Barney Halpin of the Black Diamond Flare. By the way, Major Douglas' name is seldom heard now in Alberta government circles. He's just another forgotten man, but there's no reason to lament.

IF THERE are ambitious boys or girls reading this column, here is a suggestion. During the next two weeks, write a story of from 200 to 500 words on your memories of Christmas, or on any topic pertaining to the festive season. It matters not if it deals with the coming holiday season or your experiences over the years that you first remember. There is not a pot of gold at the end of the rainbow promised as a reward for your effort, but it will be good practice, and the stories selected as the best, one from the boys and one from the girls, will be published in the Christmas issue, with the photos of the writers.

APPRECIATION is seldom expressed in tangible form for us supposedly wretched newspaper writers, maligned and derided by brainless individuals who couldn't operate a dumbcart without making a mess of themselves. So, when a smiling face shows up in the office, and hands round a couple of cigars

to the boys, we almost fall over with surprise. But it happened! In a neighborly frame of mind a week or two back, we plugged a hole in this column by heralding the birth of a baby boy in one of our neighboring households. A few days later in walked the father, and even flattered us by remarking that some day his newly arrived son might be a newspaperman, too. So, he not only gave us some good cigars to smoke, but also made us feel that there was at least one soul who had a good opinion of the newspaper fraternity. Can you blame us if we include him as being among the salt of the earth?

## Legal Notices

NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF WILLIAM BELL, late of Coleman, in the Province of Alberta, hotel proprietor, deceased.

NOTICE is hereby given that all persons having claims upon the estate of the above named William Bell deceased, by carrying on business as Grand Union Hotel, who died on the 29th day of October, 1938, are required to file with the undersigned by the 6th day of January, 1939, a full statement of their claims and the value of the same, which will be held by them and that after the date of the death of the deceased, the Executrix will distribute the assets of the estate among the parties to the claim, excepting having regard only to the claim on which notice has been filed or which have been brought to her knowledge.

DATED this 16th day of November, 1938.

# Two Alberta Brothers Win Wheat And Oats Title At Chicago Show

Chicago. — Two young Canadian brothers qualified as champion grain growers when they moved into the "king row" at the International Grain and Hay Show.

F. Rigby, 23, of Wembley, Alta., pushed all competition aside to win the coveted "wheat king" crown and his brother, W. Justyn Rigby, 22, took a place alongside him as "oats king."

The "wheat king's" sample of grain of the Reward variety was outstanding. It weighed 67.5 pounds to the bushel and judged said the sample was one of the finest of red hard spring wheat they had ever seen.

The Reward variety was developed by Canadian government experimental farm at Ottawa in 1924 and the award marked the seventh consecutive time this variety has won here in annual competition.

In the last 10 years of wheat competition Canadians have won 16 times. Young Rigby unseated Gordon Gibson of Ladner, B.C., the 1937 wheat king.

Never before in the history of the International Grain Show competition here have brothers annexed the two crowns.

The brothers operate with their father a 320-acre farm at Wembley, in the Peace River country of Alberta. Both gained experience in raising grain as members of the Canadian boys' and girls' farm clubs.

The reserve wheat championship went to R. P. Robbins of Shaunavon, Sask., who exhibited a sample of Durum Minutum wheat and second place in the hard red spring wheat went to Herman Treille, a five-time wheat king who lives not far from the Rigby boys in the Peace River valley. He, too, showed a sample of the wheat variety.

None of the Canadian grain winners was here to receive their awards.

W. Justyn Rigby unthroned another Canadian, Alex. M. Stewart, of Ailsa Craig, Ont., who was the 1937 oats king.

Rigby's championship sample of Victory oats, which weighed 48.8 pounds to a bushel, was the same variety that won the Canadian oats king title for him last week at the Royal Winter Fair at Toronto.

Sunday's award marked the 11th time since 1920 that the oats championship went to Dominion farmers. Ten of these championships went to the province of Alberta.

The reserve championship in oats went to Paul Swisher of Hotchkiss, Colo., on his sample of Colorado No. 7.

Oats, region 1, W. Justyn Rigby, Wembley; second, Eli Lastivka, Waddington, Alta.; third, Stanley M. Joyce, Westlock, Alta.

Hugh Jeffry of Whithby, Ont., took a championship in soy beans with a sample of Mandarin beans.

Other results:

Field beans, navy, first, Albert C. Gohn, Emo, Ont.; second, H. Graham, Iron Springs, Alta.; third, G. P. Hilliard, Monarch, Alta.

Field beans, Great Northern, second, C. Trowell, Seaford, Sask.

Field beans, other varieties, first, Abraham Maycock and Sons, Milford, Ont.; second, J. Brindley, Lethbridge, Alta.

## Measures Taken By France To Combat Strike Of Workers

Paris. — Mobile guards battled strikers occupying the Renault automobile works in an outbreak accompanying a wave of strikes which, at the peak, involved more than 74,000 workers.

Dozens were injured on both sides and much of the Paris factory's machinery was reported wrecked before the Renault strikers, estimated to number 10,000, left the plant.

Premier Daladier assumed complete control of measures to combat the strikes called in opposition to the government's decree law for lengthening the 40-hour week. He ordered 4,000 railroad employees at Valenciennes into military service and told police to clear important Paris factories.

At the Renault plant the strikers had barricaded themselves inside the workshops and barred doors with armored cars and tanks manufactured by the plant.

The guards, commanded by police prefect Roger Langeron, charged

## Havens For Refugees

Fertile Lands In South America Awaiting Development

Washington. — Proposed havens for Jewish refugees in Africa and South America were described by the National Geographic Society as generally productive and fertile lands awaiting economic development.

British colonies of the principal territories mentioned as possible new home for Jews is larger than England, Scotland and Wales combined. It has a population of only about two persons per square mile.

Although more than 2,000,000 ounces of gold and 2,000,000 carats of diamonds have been brought out of British Guiana's jungle hinterland, the Geographic society said, reported deposits of manganese, oil and mica have been almost untouched because river traffic is difficult.

The former German colony of Tanganyika in East Africa, now governed by Great Britain, has also been suggested as a refuge.

Tanganyika's 366,000 square miles of territory supports agricultural, hunting and pastoral operations. Sisal, cotton, coffee, nuts and grain are among the country's major products.

Kenya, north of Tanganyika, also offers opportunities for settlers. It is larger than France, contains thousands of square miles of excellent farm lands.

Northern Rhodesia, mentioned as another possible refuge, occupies most of the central plateau of Africa. Mineral resources — copper, lead and zinc — have not been extensively developed there and the colony has attracted only about 10,000 white men.

## Confers With Windsor

Premier Chamberlain Meets Duke In Paris Hotel

Paris. — Prime Minister Chamberlain and the Duke of Windsor conferred here on what informed British sources said were plans for the former king to return to England.

The meeting was the first between the duke and a prime minister of Great Britain since he had a last talk with Earl Baldwin, then prime minister, shortly before abdicating Dec. 10, 1936.

Alone, without notice the prime minister, here for talks on defense plans with French statesmen, went to the duke's hotel for a 20-minute conversation. His companion was Foreign Secretary Halifax.

Afterwards Mr. Chamberlain came downstairs with a smile. Lord Halifax kept his usual stoic mien.

Sources close to the duke indicated the prime minister's visit was the other step in negotiations opened by the Duke of Gloucester, on Nov. 11.

At that time it was reported the Prince and Duchess of Windsor were looking forward to Christmas in England, perhaps at the traditional royal family reunion at Sandringham.

To Help Jews

London. — Lord Baldwin is planning a nation-wide appeal by radio on Dec. 7 in an effort to raise a national fund which will assist German Jewish refugees to find homes in other parts of the world. The appeal, it is announced, will be made in behalf of the Church of England, the Roman Catholic Church, all Five Churches, and the Jews themselves.

## LADY POLICE ON DUTY IN CHINA

Smartly uniformed and well drilled, these women "cops" have been organized by the Japanese-controlled government at Peking, China. Their duties consist mainly in searching members of their sex suspected of carrying weapons or other contraband.

## No Guarantee Of Sending British Forces To Aid Of France

London. — Authoritative sources stated Great Britain had decided not to give France a binding guarantee to send a full-scale expeditionary force to Europe should war break out and that Britain's contribution at the start of hostilities would be concentrated on the sea and air.

The disclosure came as Prime Minister Chamberlain and Foreign Secretary Halifax returned to London from Paris after two days of talks with Premier Daladier and Foreign Minister Bonnet which informed press as "useful but unlikely to lead to anything sensational."

It is understood Mr. Chamberlain also told France he was not introducing any form of compulsory national service.

The two premiers publicly declared in Paris their complete accord on national defense and diplomatic collaboration "for the preservation and consolidation of peace" but details were withheld.

Mr. Chamberlain's decision to demand a guarantee that 13 divisions of the territorial army would be sent to Europe immediately, following the regular army, at the outbreak of war was regarded here as of vital interest to Canada and the other dominions.

If Britain did not send an expeditionary force, it was understood, it

was extremely unlikely Canada would be asked to send one.

The French request for the pledge was understood to be based on the fact 40 Czechoslovak divisions disappeared as potential allies in the Munich settlement. Consequently, France believed Britain should fill the gap between despatch of its regular army, which is comparatively small, and formation and training of a conscript army by sending to the continent the territorial divisions.

The two countries agreed to devolve their air development plans, it was understood, but no sharp division was set for construction of bombers and fighters. Indications were Paris reports stating Britain would concentrate on building fighter planes and France bombers were exaggerated.

Canada was regarded here as unlikely to share in French aircraft contracts as the Canadian industry is only just beginning to produce a few British bombers and a long time would be required before it could expand sufficiently to take on orders from outside Britain.

Informed sources said while the Anglo-French conference might have been planned originally as a spectacular move along the Munich road to European appeasement, any such hopes were wrecked on the recent German anti-Jewish drive which postponed any fresh approach to Germany.

## Honor For Artists

Toronto Woman Sculptor One Of Four To Receive High Award

Toronto. — Four academicians were elected by the Royal Canadian Academy of Art at its annual meeting. Election of Florence Wylie, 57-year-old Toronto sculptor, makes her the fourth woman to receive the academician status in the 58-year history of the R.C.A. Twelve of her works are in the National gallery at Ottawa. She is a native of Trenton, Ont. The other three academician award are Frank Carmichael, Toronto painter, who was born at Orillia, Ont.; William Lyon Somerville, Toronto architect, and Alphonse Joncas, Montreal portrait painter. Somerville is a native of Hamilton.

## Utilities Commission

Bill Introduced In B.C. Legislation To Regulate Various Activities

Victoria. — Premier T. D. Pattullo introduced in the British Columbia legislature a bill which would authorize the government to set up a three-man public utilities commission to regulate various utilities "subject to the legislative authority of the province."

The bill would give the board authority to control persons or companies which operate railways, street railways, tramways, ferries, toll bridges, telephone and telegraph operations "where such service is offered to the public for compensation," gas, electric and power plants, furnishing water to the public and taxes or trusts of public conveyances.

The bill would omit operation of a taxicab by an individual from classification as a public utility.

**To Extend Terms**  
Ottawa. — Terms of Lieutenant-governors whose appointments expire before the conclusion of the Canadian visit late next spring of the king and queen will be extended until after their Majesties have left, Prime Minister Mackenzie King announced.

## Franco-German Peace Declaration Meets With Approval

Berchtesgaden, Germany. — Chancellor Hitler's approval of the proposed Franco-German peace declaration was seen as an announcement Foreign Minister Joachim von Ribbentrop probably would start "within the next few days" for Paris to sign the agreement.

The announcement was made after a conference of the two leaders which followed receptions by Hitler of distinguished foreign guests, Oswald Pirow, minister of defense of South Africa, first, and then King Carol and Crown Prince Michael of Rumania.

Informed sources said the declaration would embrace three points:

1. A joint acknowledgment that peaceful and good neighborly relations between Germany and France constitute an essential element to the consolidation of Europe and maintenance of general world peace.

2. A statement to the effect no territorial issues exist of a nature likely to lead to conflict. The country was said will declare the other's borders are inviolable.

3. An agreement by both powers to enter upon joint deliberations in the international difficulties or points of issue concerning both.

Before he settled down with Von Ribbentrop for discussion of the proposed draft, Hitler conferred for an hour with Pirow and with King Carol for three hours.

Pirow's European trip, which so

far has taken him to Portugal, Great Britain, and Germany, was described as an informal tour of private character for information. The South African, accompanied here by South Africa's minister in Berlin, Stephanus Gie, originally was scheduled to meet Hitler for an extended visit.

The program was changed and only one hour was allowed for what was interpreted as being little more than courtesy call. It had become evident, meanwhile, Mr. Pirow was not coming to talk about the colonial question.

Paris. — Great Britain and France affirmed publicly their complete accord on national defense and diplomatic collaboration "for the preservation and consolidation of peace."

Prime Minister Chamberlain and Premier Daladier, at close of conversations which followed the arrival here of Mr. Chamberlain and his foreign secretary, Vliscoff, Halifax, read statements at the Quai d'Orsay in which each stressed total agreement on the principles concerned.

The Netherland mentioned detailed points in their discussions. Mr. Chamberlain first announced Britain and France had reached complete accord on national defense and joint diplomatic action for peace.

In his declaration, read to French and foreign newspapermen, he said: "With us, national defense is one of the steps to be taken for preservation and conservation of peace in Europe."

# HOCKEY DAYS ARE HERE AGAIN---COLEMAN CANADIANS LINE-UP FOR 1938-1939

## Coleman to Make Determined Bid to Win Allan Cup

Introducing, ladies and gentlemen, the 1938-39 members of Coleman Canadians. Upon the broad shoulders of these husky athletes rests the senior championship hopes of the Crown. Nest Pass for hockey honors this season. A new deal in senior hockey has been made this year. The organization of every senior team in the province into one league and ruled over by a provincial executive board, and the members in turn, are now by hockey fans throughout the province, each of the seven teams in the league has spared neither time nor money in trying to secure the cream of the local intermediates, is trying out on one of the forward strings, and Goran, of Blairmore, is trying for the privilege of understanding Dave Kemp.

The majority of last year's team will be on the line-up, only three members having left for other pastures, Jimmy Jeppe, of the St. Albert, and Pat Hill, for Lethbridge Maple Leafs. Newcomers to the team are Dan Sprout and Ben Redisky, with Treherne Intermediates last season; Lloyd Sanderson, who played for Saskatoon Chiefs; Sid Sturk, of Elm-

wood Maple Leafs; Stan McKillop, who has played the past six years with Atlantic City Sea Gulls, and Les Vickory, who played for Prince Albert Mintos. In addition to those imports, whose pictures appear on these pages, there are many young players who are making their presence felt at practice sessions with a view to making the team. Johnny Eick, of Hillcrest, who has starred for the Mintos and Belvedere, is in his number of years now, trying out for a defence berth. Bill Fields, who has played the past two years for the local intermediates, is trying out on one of the forward strings, and Goran, of Blairmore, is trying for the privilege of understanding

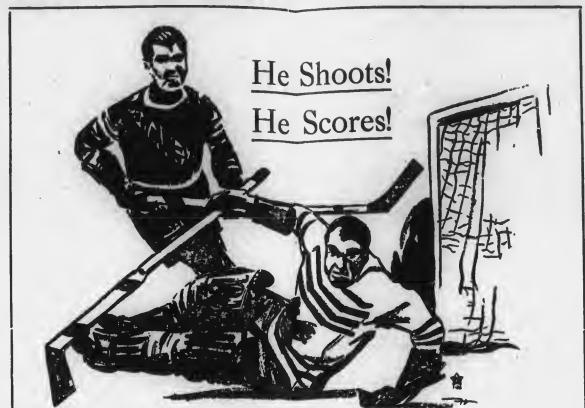

Dave Kemp.

Pete Brown, and Duke Kwasnie, who were missing from last year's line-up, are again in the fold, each trying to win back their old berths. The stars of previous years are still willing and able to carry Coleman's challenge for championship honors and include the Fraser brothers, Joyce, Lopichuk, Landiak, Schnepp, Jenkins and Kemp.

## Kimberley Will Play Opening Exhibition Game Saturday

### Improvements to Arena Provide Increased Facilities to Sport Fans

Improvements have been made to the arena to include a complete lighting system which will give added light, the fence surrounding the playing area has been painted white, giving off a neat and clean appearance. The new lighting system is good idea, how his lines shape up. Kimberley are world famous, winning world title this year '35 in Europe. They still have Smilin' Harry Brown and Bill Burnett on defense, a duo which takes second place to none. They also have the services of Eric Lopichuk, Sonny Somers, brother Roderick, and a number of others, so that the game will be a thriller from the first whistle.

Season tickets were on sale at McBurney's Drug Store in Coleman for the past month and a number of fans have secured their seats for the winter. Reserved seat tickets for all league games will also be sold at the drug store.

GEORGE JENKINS, left wing; age 26, height 5 ft. 7 in., weight 150; club last year, Coleman Canadians. A veteran of the team, he brings the fans to their feet with his daring plays around goal.

BEN REDISKY, centre; age 23, height 5 ft. 7 in., weight 145; club last year, Coleman Canadians. He is a veteran of the game and is the team's best utility man.

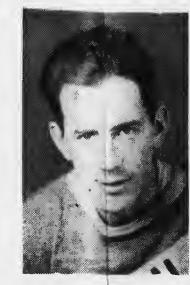

JIMMY JOYCE, defence; age 25, height 5 ft. 7 in., weight 145; club last year, Treherne Intermediates. Manitoba. Ben has a reputation for his play-making ability and speed.

DAVE KEMP, goal; age 30, height 5 ft. 8 1/2 in., weight 170; club last year, Coleman Canadians. He is team's number one defenceman. Is usually well up in scoring averages.

BILL FRASER, centre; age 23, height 5 ft. 8 in., weight 170; club last year, Coleman Canadians. He is a real play-maker and a dangerous player around goal.

STAN MCKILLOP, left wing; age 27, height 5 ft. 8 in., weight 160; club last year, Atlantic City Sea Gulls, U.S.A. Practice sessions have revealed him as a brilliant stick-handler and fast skater.

SID STURK, left wing; age 21, height 5 ft. 8 in., weight 160; club last year, Elmwood Maple Leafs. He is a player who is always giving his best and who is usually in on all the scoring plays.

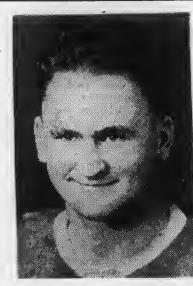

"BULL" LANDIAK, defence; age 24, height 5 ft. 8 in., weight 155; club last year, Coleman Canadians. He is a tricky, fast, a good stick-handler with a bullet shot.

PETE BROWN, centre; age 24, height 5 ft. 8 in., weight 155; club last year, Coleman Canadians. He is fast and a good stick-handler and with proper coaching should have a good season.

NORMAN SCHNEPP, right wing; age 22, height 5 ft. 8 in., weight 155; club last year, Coleman Canadians. He is fast and a good stick-handler and with proper coaching should have a good season.

LLOYD SANDERSON, left wing; age 21, height 5 ft. 8 in., weight 160; club last year, Saskatoon Chiefs. "Sandy" is a dynamo of energy and a real hockey player. Given a try-out with Red Dutton this fall.

JIM FRASER, centre; age 30, height 5 ft. 10 in., weight 160; club last year, Coleman Canadians. He is a veteran of the game and is the team's best utility man.

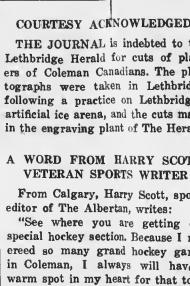

MIKE KRYSCHEK, coach. Pilot St. Boniface Seals to Dominion junior championship last season. Rapidly building Canadians into a hockey machine he hopes will win the Alberta championship.

DAVID NEVAY, trainer; serving his second year as club president. His progressive policies have given Pass fans a new deal in senior hockey.

HARRY GARDNER, serving his second year as club president. His progressive policies have given Pass fans a new deal in senior hockey.

FRED GUERARD, secretary and key-man in keeping the club's business affairs running smoothly. This is his second year as club secretary.

BILL GATE, business manager, whose business it is to keep the team supplied with sticks, pucks, tape and the hundred and one things necessary to a hockey team.

MIKE LOPICHUK, right wing; age 24, height 5 ft. 10 in., weight 160; club last year, Prince Albert Mintos. Had his best year last season. He is a persistent back-checker and gets his quota of goals.

LES. VICKORY, defence; age 21, height 5 ft. 8 in., weight 155; club last year, Treherne Intermediates, Manitoba. Fast, a tricky stick-handler and an asset to any club.

DAN SPROUT, right wing; age 24, height 5 ft. 8 in., weight 155; club last year, Treherne Intermediates, Manitoba. Fast, a tricky stick-handler and an asset to any club.

### PASS TOWNS ASK BUS SERVICE FOR HOCKEY GAMES

Enquiries have been received from hockey fans in Pass towns and also from Michel-Natal district concerning bus travel to hockey games being played at Coleman.

Miss Mae Bell, local Greyhound agent, stated that she put this question to the proper officials and had received reply that they were unable to send a driver to the Pass on such an assignment. The hockey club are at present negotiating with the bus company and expect to make an announcement soon.

Donald Jones is the only driver in the Pass that is available to meet the strict regulations of the Greyhound company and if he could be prevailed upon to take out the necessary license, it is possible the company would assign him for duty during the winter hockey season.

Donald Jones is about the last critter I ever saw!"

"Oh, you don't know about that; why, only the other day I saw him high up in an oak tree."

"Of course you did. But he laid himself down on the acorn 20 years ago."

## SUCCESS TO THE ALBERTA SENIOR HOCKEY LEAGUE

### International Coal & Coke Co., Ltd. and McGillivray Creek Coal & Coke Co., Ltd.

GOOD LUCK COLEMAN CANADIANS

The following firms also are pleased to co-operate in sponsoring this broadside for Coleman Canadians, with their best wishes for victory in quest of the Allan Cup

### The Coleman Journal

H. T. Halliwell Proprietor Commercial Printing for Every Requirement

TO ENSURE A RESERVED SEAT AT ALL LEAGUE GAMES, BUY A SEASON TICKET NOW FOR BARGAIN PRICE...ONLY \$9.00...On Sale at McBURNEY'S DRUG STORE

Among enthusiastic supporters of Coleman Canadians are hockey fans of Hillcrest. Last year they encountered difficulties in travelling the snow-blocked road between Hillcrest and the main highway, but invariably their quota was on hand at the games. Increased interest is aroused in the Hillcrest people this year by the inclusion of Johnny Eick in the recruits being tried out for a regular place on the Canadians. He will be in uniform on Saturday night for the game between Canadians and Kimberley.

Since there has been no booster club to solicit funds for the club, the team has to rely on all Pass hockey fans to get behind them and give them support. It is only by good support that a team of this calibre can function, especially when it is a member of a league in which the best hockey talent in western Canada participates.

The Journal does its part in making Coleman a better place in which to live and work.

## WORLD HAPPENINGS BRIEFLY TOLD

Since Nov. 1, 675 carloads of wheat have been shipped for winter storage at Churchill elevator, Hudson Bay Railway officials reported.

Appointment of Henry E. Ewart as master of the royal Canadian mint in Ottawa was announced by the department of the office.

Urgent necessity of the Dominion government adopting measures for increased sale of Alberta coal in Canada was voiced in a resolution adopted by the Alberta legislature.

Formal invitations to more than 70 delegates to the 1940 Empire Parliamentary Association conference to be held in New Zealand are being sent out.

The London Sunday Pictorial reported the Duke of Gloucester would be named viceroy of India at the end of the term of the present viceroy, the Marquess of Linlithgow.

The Swiss government has granted permission for a limited number of Jewish children from frontier regions of Germany to enter Switzerland temporarily.

Claude C. Pontier of Montreal was re-elected president of the Canadian Association of Tourist and Publicity bureaus at the concluding session of the annual convention. The 1939 convention will be held in Vancouver.

Between 60 and 90 giant airliners will carry Christmas mail to 40 territories included in the empire air mail scheme. They will probably carry around 350 tons, roughly 11,000,000 letters.

Great Britain is still the "hostile" European country by United States voters but during the last year and a half her popularity has waned by seven per cent, according to a country-wide survey by the American Institute of Public Opinion.

## Longevity Of Canadians

People Have Quite An Advantage Over British Cousins

The Canadian boy of five can look forward to two full years more of life than the British boy of five, says Canada's Weekly. The Canadian at 40 has 32 years in front of him at against less than 30 of his British cousin. Even at 75 there is a difference in favor of the Canadian of a little more than a year.

There must be a reason for the great longevity of Canadians. Is it their healthy, rugged climate? Is it a superior resistance to disease or stronger physique? Is it due to their advanced medical facilities? Is it their comparative wealth, their higher standard of living, their fine social service? What is it?

The idea of the experts is that all of these things enter into the picture, but it cannot be denied that there is another element which has a bearing upon the great longevity of the Canadian.

Consider for a moment the probability of a person aged 25 dying within five years. The probability is greatest in the Maritime Provinces and least in the Prairie Provinces, being twice as high in the former as in the latter. The expectation of life at the age of five is over 64 years in the Prairie Provinces and under 61 in Quebec, to take the two extremes.

Why should the Prairie Provinces show better than Quebec and the Maritimes? The answer is simple. When large movements of population take place, there is a tendency for the more healthy and energetic elements to move, while the less healthy people stay at home. To move to a strange land requires, even at this day, something of the pioneering spirit. Hence it is that the Western Provinces of Canada have the highest mortality. These Provinces have received much of their population very recently.

## The Eiffel Tower

Not Most Beautiful Building, But Is Biggest Drawing Card

The Eiffel Tower, situated the Ottawa Citizen, is the tallest structure in Europe, is not the most beautiful. It is not the most beautiful in Paris. As a matter of fact it has probably been called more bad names by more architects than any other building of comparable size on the face of the earth.

But the Eiffel Tower turns out to be the country's biggest drawing card. Over 800,000 people visited it last year; nearly 300,000 more than visited the Louvre Museum, a few blocks distant. All the Louvre has to offer is the greatest collection of art the world possesses.

New Guinea airplanes are carrying native passengers by weight, the charge being 10 to 25 cents a pound according to the distance travelled.

There are 650 people per square mile in Belgium.

## Glacier Crash

Unusual Phenomenon Occurs In The Canadian Rockies

The collapse of Hector Glacier in Banff National Park, Alberta, during the early autumn of 1938, provided a phenomenon of rare occurrence in the Canadian Rockies. Situated about 12 miles north of Lake Louise on the southeast slopes of Mount Hector, the glacier slipped from its rocky moorings high on the side of the mountain, and crashed in a great avalanche into Molar Creek valley, uprooting trees and carrying before it everything in its path.

Unwitnessed by man, the avalanche was discovered by a local guide returning with a party from a hunting trip outside the park borders. The glider was found to have travelled a distance of about two miles and had spread over the valley in a broad carpet of ice a couple of hundred feet deep. Two weeks prior to its disappearance, when the region was visited in a glistening mass high on the rocky slopes. Old-timers in the district state that a similar occurrence cannot be remembered in 40 years.

Mount Hector is one of the massive peaks that are viewed by travellers on the new Banff-Jasper Highway under construction between Lake Louise and Jasper. It rises to a height of 11,135 feet above sea level, and forms a landmark for many miles. The completed section of the highway in Banff Park which is now open to the public, skirts the western slopes of Hector Mountain for a distance of nearly ten miles. Continuing past Bow Lake, over Bow Pass and down into the Mistaya River Valley to the Saskatchewan River, it provides a magnificent scenic route of nearly 50 miles.

The glider, however, was situated over the crest on the eastern side of the mountain.

## Scout Award For Courage

Given To Man Facing Death Who Still Carries On

Stanley Ince not only knows how he is going to die—he knows how he is going to do it again.

Ince, who is 53, suffers from crooked palate. It is incurable.

A prominent official in London's Boy Scout organization, Ince received an Armitage Day Scouting's highest honor. It is the Cornwell decoration for courage, capability and character. The award goes to Ince because of the heroism with which he has faced his ailment.

The only other man ever to receive the Cornwell decoration was Sir Abe Bailey, the South African millionaire. Sir Abe has had both legs amputated.

Ince is warden of Roland House Scout settlement. He is practically helpless physically. Daily he is driven to Roland House, and propped up at his desk.

"I thought I might as well chuck up the sponge when I caught an incurable paralyzing disease," he barbers during the war he said.

Then he met Sir Roland Phillips, a local Scout organizer, in London's East End, and had been asked in action and in his will had asked Ince to carry on his work.

"And I suddenly saw something worth living for," Ince declared.

That was more than 20 years ago—but he's still living for it.

## Western Clydesdales

High Awards For Western Provinces At Royal Winter Fair

Mr. W. Brownridge of Portage la Prairie, Man., won at the Royal Winter Fair the Mark Duff memorial shield for the best Clydesdale female, three years or over, was won by the Stewart brothers of Griswold, Man., with the Alberta agriculture department of Edmonton, second.

An animal owned by Brownridge placed first in a class for the best Canadian-bred female under three years. Dominant experimental farm of Indian Head, Sask., was second in this class first in an event for three animals, three years or under, that get one of one acre.

D. McKay of Aberdeen, Sask., won in the class for two animals, three years or under, the progeny of one dam.

Policeman: Full up to the curb, lady. Do you know you were doing 75?

Young lady: Isn't it marvellous. And do you know, I only learned to drive yesterday!

Mohammedans believe the Moors will return to Spain when the hand and key carved in stone over a gate-way to the Alhambra touch each other.

## Trackless Trolley Buses

Winnipeg Is Second City In Canada To Adopt Modern Transportation Method

Trackless trolley buses, first to appear in western Canada, went into service recently on a west end line of the Winnipeg Electric Company. When the six new buses started from near Portage and Main streets of downtown Winnipeg, the city became the second in the Dominion to have the latest method of electric transportation. Montreal trolley buses have been running for almost a year.

President Edward Anderson, addressing more than 100 provincial government, civic and company officials at a luncheon just before the service started, said the trolley bus was to "try" from the horse-drawn cars in 1880 to the first electric cars in Winnipeg in 1892.

Difficulties of the street car transportation business are mounting, the president stated. While the company spent \$350,000 on an improvement program since 1934, the passengers carried have fallen off. In 1929 the company carried 61,238,734 revenue passengers, compared with only 43,579,017 a year ago.

A public service such as this will have to be undertaken by public authorities, said the president in advocating a partnership between the city and the company.

The new buses operate on a double trolley, the electric current flowing from one wire into the bus motor and out over the other wire. Long, flexible trolleys allow the busses to swing in and out of traffic without losing contact with their power wires.

## Helium In Canada

Gas Can Be Produced In Ontario And Alberta

Helium can be produced in several parts of Canada, according to the Quebec Medical Journal.

The journal states that the belief that the United States has a monopoly on the gas is a fallacy. The United States is the only country producing helium, it explains, but Canada has produced the gas in the past and will do again.

During the world war, according to the journal, deposits of gas were found and recovered in several parts of Ontario and Alberta. The development of new uses for the gas in medical science is drawing attention to the Canadian resources again, it is added.

The journal said experiments have been made in the use of helium for treating pneumonia and heart conditions and it promises to be of great aid in respiratory disease. A colorless, odorless, tasteless, non-poisonous and non-inflammable gas, helium also has other uses such as in preserving of food, in fire-proofing and in radio tubes and illuminated signs, it adds.

So far as is known Canada is the only source of helium in the British Empire, the journal said.

## Does Not Matter Much

The question has often been asked: "What is a billion?" An authority states forward to answer it by saying that an American billion is a thousand millions while an English billion is a thousand thousand millions—not that it makes much difference if they are talking of dollars for most of us are talking of dollars for most of us will never see it.

One of the roads on the island of Crete was built about 1500 B.C. and is still good enough for an automobile to travel at 60 miles an hour.

Some species of spiders build in colonies, with several webs, united by common lines. Entangled prey belongs to the first spider to reach it.

A special award donated by the Clydesdale Horse Association of Canada for the best Canadian-bred female, three years or over, was won by the Stewart brothers of Griswold, Man., with the Alberta agriculture department of Edmonton, second.

An animal owned by Brownridge placed first in a class for the best Canadian-bred female under three years. Dominant experimental farm of Indian Head, Sask., was second in this class first in an event for three animals, three years or under, that get one of one acre.

D. McKay of Aberdeen, Sask., won in the class for two animals, three years or under, the progeny of one dam.

Policeman: Full up to the curb, lady. Do you know you were doing 75?

Young lady: Isn't it marvellous. And do you know, I only learned to drive yesterday!

Mohammedans believe the Moors will return to Spain when the hand and key carved in stone over a gate-way to the Alhambra touch each other.

2238

## TWO FROM A NEW BASIC DESIGN

By Anne Adams

Behold some exciting new "Pattern Magic" by Anne Adams, a dress and a hat, both in a new basic design. The silhouette is the newest ever—a gathered top with a slim-skinned, gently flared skirt, a button front, and another feature as popular as the charming swirl of movement that lies below the knees in the case of the hat. And consider whether to have the collar a daintier Peter Pan design or the equally gracious "notched" type. Brilliantly patterned cotton is used for the new, lustrous robes, and flannel for a cold-weather-style with short sleeves. The frock has youthful chintz in any word and in act, strict fulfillment of every obligation, straightforward in carrying all promises made on the part of the wearer, of the temporary gain or loss to ourselves, are the things that give us the right and power to be members of a free commonwealth" (Arthur Twining Hadley).

Pattern 4960 is available in junior and misses' sizes 10, 12, 14, 16 and 18. Size 14 takes 4 1/4 yards 36 inch fabric.

Size twenty costs 20c (no coins stamps cannot be accepted) for this Anne Adams pattern. Write plainly.

Size, Name, Address and Style Number and in order to get Anne Adams Pattern 4960, Dept. D, Winnipeg News Paper, 176, Winnipeg, A.C. E. W. Windup.

## Music And Work

Factory Workers Speed Up When Music Is Played

Those skilled factory workers on the assembly line like their swing but they're not jitterbugs.

Workers on jobs requiring a high degree of hand and finger dexterity do better work with less spoilage when listening to the crooning of Bing Crosby or the "sweet" swing of Guy Lombardo.

These are conclusions of Dr. John Hume, assistant professor of psychology at the Pennsylvania State College who conducted experiments in a Pennsylvania factory.

"And I suddenly saw something worth living for," Ince declared.

That was more than 20 years ago—but he's still living for it.

Following their capture by park wardens the animals were subjected to medical inspection and given a clean bill of health. Special crates were prepared for the buffalo and elk and they were shipped by rail from Lamont, Alberta, to Vancouver, B.C., accompanied by an attendant and sufficient food for the trail journey.

Youngsters who will sail on the M.S. Hauraki for New Zealand on November 24, and will be fed and tended by a member of the ship's crew during the three-week ocean voyage.

Canada's success in preserving the buffalo and elk is a notable example of the value of timely conservation.

Once in danger of extinction, both of these species are now so numerous in the park areas of Western Canada that periodic reductions are necessary to prevent over-crowding and overgrazing.

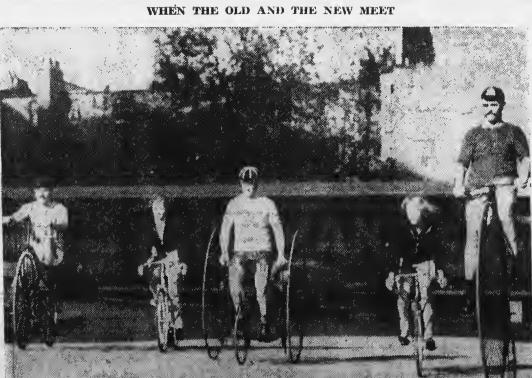

Motor buses in Venezuela are adorned with scenes from the Bible, because the natives believe these will help to ward off accidents.

Smith: And do the people next door holler much from you?

Jones: Borrow? Why, I feel more at home in their house than my own.

The human body breathes more water from the ground on a hot day.

WHEN THE OLD AND THE NEW MEET

Many weird machines put in an appearance at the Bicycle and Motor Cycle Show in London recently, when this picture was taken the old and the new put on a demonstration, much to the enjoyment of the press photographers.

## SUNDAY SCHOOL LESSON

DECEMBER 4

### THE SIN OF LYING

Golden text: Behold, thou dostest truth in the inward parts. Psalm 36:3. Lesson: Exodus 20:16; II. Kings 5:20-27; Proverbs 6:18-19; Mathew 10:19; John 8:42-47; Ephesians 4:23; Revelation 22:14, 15. Devotional Reading: Revelation 21:21-27.

### Explanations And Comments

The Ninth Commandment: The Law of Truthfulness. Exodus 20:16. This law refers primarily to false evidence given in a court of justice, and then, in a general and more absolute sense, about another given under any circumstances.

Jesus the Evangelist, John 8:44, says Jesus is arguing with his enemies and tells them that if they were God's children they would have welcomed him who had been sent to them by God. The fact that Jesus could not understand them was because they were unable to receive his message, "there was in them no moral capacity to receive the truth he delivered."

Scripture Zechariah 4:25. Compare Zechariah 8:16. We are members one of another and must speak the truth with one another.

Jesus has said, "If we say we have seen and known the truth, and yet deny it before the world, then we are to be reckoned as liars." (I John 1:6.)

It is in the use of Radium that the element of cancer is treated. For the treatment of cancer the element is placed in tiny needles of platinum or radium, and these are inserted into the growth or placed close to the growth to be treated. The constant rays given off from the radium cause the cancer cells to die.

In institutions where the supply is sufficient, containers with 4, 8, 10 or more grams of radium are used. The effect of these is similar to the rays from a million-volt x-ray equipment.

Radium in another form, this is used for the treatment of cancer or the removal of a tumor by an apparatus called an enucleation plant. There are several of these plants in Canada. The plant, an ingenious combination of glass tubes and steel, collects and filters the radium rays emanating from a solution of radium bromide. These rays are finally absorbed in tiny glass tubes about one inch in length. These, called radon seeds, are planted in the growth to be treated and may be left there to effect the cure in a few days.

So far twenty coats (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly.

### PRESENTS TOPICS OF VITAL INTEREST

BY DR. J. W. S. McCULLOUGH

### THE SHEET OF RADIUM NEEDLES

A doctor in New York has lost five radium needles presumably by theft. These needles contained altogether 50 milligrams of radium worth, at present prices, about a couple of thousand dollars.

These needles are used in radium needles are used in the treatment of cancer. For this purpose Canada, in its various clinics for the treatment of cancer, uses about 20 grams worth, at a conservative estimate, about \$700,000 though it cost the clinics or hospitals that amount to the element almost twice that figure.

In the use of radium for the treatment of cancer the element is placed in tiny needles of platinum or radium, and these are inserted into the growth or placed close to the growth to be treated. The constant rays given off from the radium cause the cancer cells to die.

In institutions where the supply is sufficient, containers with 4, 8, 10 or more grams of radium are used. The effect of these is similar to the rays from a million-volt x-ray equipment.

Radium in another form, this is used for the treatment of cancer or the removal of a tumor by an apparatus called an enucleation plant. There are several of these plants in Canada.

The plant, an ingenious combination of glass tubes and steel, collects and filters the radium rays emanating from a solution of radium bromide. These rays are finally absorbed in tiny glass tubes about one inch in length. These, called radon seeds, are planted in the growth to be treated and may be left there to effect the cure in a few days.

## DO THIS

TO RELIEVE PAIN AND  
DISCOMFORT OF A COLD  
Follow Simple Method Below  
Takes only a Few Minutes When  
"Aspirin" is Used

1. To ease pain and discomfort and reduce fever take 2 "Aspirin". Tablets—Pour a glass of water. Repeat in 2 hours.

Eases Pain and Discomfort, and  
Sore Throat Accompanying Colds  
Almost Instantly

The simple method pictured above often brings amazing relief from discomfort and sore throat accompanying colds.

Try it. Then—*see your doctor*. He probably will tell you to come back with "Aspirin" because it acts so fast to relieve discomforts of a cold. And reduce fever.

This simple way, backed by scientific research, is the best method for the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

Demand and Get  
"ASPIRIN"

CHAPTER VIII.—Continued

"Watch what you're saying!" Jack exclaimed.

McKinzie Joe eyed him.

"Pick up that gold if you can find it," he answered coldly. "You'll find it's flat, with old scratches on it—scraped out from ridge riffs in the main body of the stream. It never came from gravel."

"Then I was lying?" asked Kay. She swept her glance suddenly to include another figure; Jeanne Towers had rounded the side of the cabin. Kay turned at her, then turned back to McKinzie Joe. "Answer me, was I lying?"

"Yes, you were lying," Joe answered quietly.

"Joe! Take that back!"

"Never mind doubting your facts, Jack," the older man said. "I could kill you the best day you ever lived. But I wouldn't. And I'm going—getting out of here."

"Sure, of us has got to go?"

"Sure. I know it. But remember you caught a little a hay when in front of a horse to make him follow you into a corral. You're being lied."

Jack Hammond lunged angrily toward his partner, only to be confronted by Jeanne Towers, a queer, pale-eyed girl with a thin face. Kay Joyce merely stood still, her lips livid; her eyes strangely narrowed. The Northern girl braced herself.

"Get hold of yourself, Jack!" she commanded.

Slowly, Jack Hammond moved back. There was a long silence. Then the younger man asked:

"Well, Joe, do I buy you out—or do you take my share?"

"You can't have my share!" Kay snapped. "It's got to go!"

McKenzie Joe looked about him. Uneasily he wiped a shaking hand across his lips.

"I guess the young lady answered for me," he said. Jack stamped into the cabin, to return almost as quickly. He held in his arms four heavy moosehide pouches, lumpy with gold nuggets.

"It's everything I've got," he said shortly. "Sign up and get out."

Jeanne Towers straightened.

"Jack!" she cried. "You fool—you fool!" Then with a half sob, she whistled and ran back to her cabin.

CHAPTER IX.

More than two months had passed since that morning when Jack had walked drearily back from the lake, gaunt with the weight of strange, foreboding sadness. Once the heat of their quarrel had begun to cool, memory had, to a degree, at least, brought about a truce in the bitterness between McKenzie Joe and himself. The signing over of the necessary papers which had put Jack in possession of all the claims had been done in silence, it is true, but not taciturnity.

The new radios are about the last word in perfection, but they still lack a gadget that permits you to tune out your neighbor's set.

A cure has been found for hay fever. It is a serum extracted from ducks. Another quack remedy, no doubt.

**Quicker  
RELIEF  
FROM  
COLDS**  
Soothing, Penetrating...  
This Remedy Brings  
Relief Overnight

Miserable, aren't you, with your nose constantly running . . . , nasal passages inflamed . . . , head aching . . . throat raw . . . eyes painful with persistent watering?

Why continue to suffer? Get relief NOW . . . with good old Mentholatum. This famous liniment is the standard first of all liniments. It is a liniment. Rub a little Mentholatum well on the nostrils. See how quickly this healing balm works . . . how it fights lurking germs . . . retards the gathering of mucus . . . soothes red, inflamed membranes . . . relieves that choked, stuffy feeling . . . clears your head and nose and helps keep them clear. Get a 30 cent tube or of Mentholatum today. Use it tonight. *Relief is guaranteed or money back.*

"Write to me sometime, Joe?" Jack had asked as the older man took his departure.

"I will." He was glad to do that, Jack. If there's anything to write about. And say—

"Yes?"

"Don't hold it against Jeanne for what she said. Me 'n' Jeanne have always thought a lot of each other. It was kind of natural that she'd take up for me."

"Of course, Joe."

The older man had looked far down the lake, glassy smooth, and with drifting, imaginary ripples floating in mirage.

"For that matter, she's always thought an awful lot of you. A lot more's she did of me."

"I know it, Joe." The older man had looked at him keenly, his eyes sparkling, as if he were about to say that this was just the truth, that he didn't know it. But he didn't. replied:

"Well, I guess I'd better be getting on—better be takin' advantage of this calm. Old Sapphire gets pretty nasty sometimes."

"Yes, it does, Joe." Impetuously he had put forth his hand. "Shake with me, Joe!"

"Sure, you were lying," Joe answered quietly.

"Joe! Take that back!"

"Never mind doubting your facts, Jack," the older man said. "I could kill you the best day you ever lived. But I wouldn't. And I'm going—getting out of here."

"One of us has got to go?"

"Sure, I know it. But remember you caught a little a hay when in front of a horse to make him follow you into a corral. You're being lied."

Jack Hammond lunged angrily toward his partner, only to be confronted by Jeanne Towers, a queer, pale-eyed girl with a thin face. Kay Joyce merely stood still, her lips livid; her eyes strangely narrowed. The Northern girl braced herself.

"One of us has got to go?"

"Sure, I know it. But remember you caught a little a hay when in front of a horse to make him follow you into a corral. You're being lied."

Jack Hammond lunged angrily toward his partner, only to be confronted by Jeanne Towers, a queer, pale-eyed girl with a thin face. Kay Joyce merely stood still, her lips livid; her eyes strangely narrowed. The Northern girl braced herself.

"Get hold of yourself, Jack!" she commanded.

Slowly, Jack Hammond moved back. There was a long silence. Then the younger man asked:

"Well, Joe, do I buy you out—or do you take my share?"

"You can't have my share!" Kay snapped. "It's got to go!"

McKenzie Joe looked about him. Uneasily he wiped a shaking hand across his lips.

"I guess the young lady answered for me," he said. Jack stamped into the cabin, to return almost as quickly. He held in his arms four heavy moosehide pouches, lumpy with gold nuggets.

"It's everything I've got," he said shortly. "Sign up and get out."

Jeanne Towers straightened.

"Jack!" she cried. "You fool—you fool!" Then with a half sob, she whistled and ran back to her cabin.

CHAPTER IX.

More than two months had passed since that morning when Jack had walked drearily back from the lake, gaunt with the weight of strange, foreboding sadness. Once the heat of their quarrel had begun to cool, memory had, to a degree, at least, brought about a truce in the bitterness between McKenzie Joe and himself. The signing over of the necessary papers which had put Jack in possession of all the claims had been done in silence, it is true, but not taciturnity.

The new radios are about the last word in perfection, but they still lack a gadget that permits you to tune out your neighbor's set.

A cure has been found for hay fever. It is a serum extracted from ducks. Another quack remedy, no doubt.

"Write to me sometime, Joe?" Jack had asked as the older man took his departure.

"I will." He was glad to do that, Jack. If there's anything to write about. And say—

"Yes?"

"Don't hold it against Jeanne for what she said. Me 'n' Jeanne have always thought a lot of each other. It was kind of natural that she'd take up for me."

"Of course, Joe."

The older man had looked far down the lake, glassy smooth, and with drifting, imaginary ripples floating in mirage.

"For that matter, she's always thought an awful lot of you. A lot more's she did of me."

"I know it, Joe." The older man had looked at him keenly, his eyes sparkling, as if he were about to say that this was just the truth, that he didn't know it. But he didn't. replied:

"Well, I guess I'd better be getting on—better be takin' advantage of this calm. Old Sapphire gets pretty nasty sometimes."

"Yes, it does, Joe." Impetuously he had put forth his hand. "Shake with me, Joe!"

"Sure, you were lying," Joe answered quietly.

"Joe! Take that back!"

"Never mind doubting your facts, Jack," the older man said. "I could kill you the best day you ever lived. But I wouldn't. And I'm going—getting out of here."

Sets to suit any taste and purse. Three to Twelve Pieces to a set. Prices ranging \$2.95 to \$25.00

All in pleasing colors and designs, from which you can solve your gift problems.

We carry hundreds of other Gift items at all prices.

**Mrs. Ed. Liedieu**  
Coleman's popular Restaurant & Lunch Counter

We are in receipt of the following courteous letter from LIBERTY Publishing Company of Canada Ltd.:

"We are extremely happy to allow you to refer in the article you submitted in our to the George Soltko article 'BLUE MILK AND WHITE' which appeared in our November 26th issue. We consider the material in this series to be of such value to the public that we are glad that we are happy to assist in the further distribution of these facts."

"May we have your permission to reprint all or part of your letter of November 21st in our Vox Pop pages?"

—Sincerely,

We regret the necessity of delaying the LIBERTY contest a week in order to consider suggestions from several citizens towards making it more successful. We expect to publish the first List of Questions in next week's newspaper.

**MEADOW SWEET DAIRIES LTD.**

### Santa Claus By Airplane

A very nice gentleman, pleasant of manner and speech, interviewed a few business men to find if they would play host to Santa Claus, who would have landed here from an airplane a few days before Christmas. Santa would be greeted by hundreds of children, and adults as well, and he would distribute some dainties to the children, and would be invited to play Santa in some other towns.

Now the plan is of interest to children, and to merchants who might see an opportunity for increased business by drawing in people from all around. Prairie towns might play host with a certain amount of profit to the merchants and to the unbound-ed delight of the children.

But here in these prairies there is a small population to attract, except a brown bear or a few other wild animals, to whom Santa would have no appeal. John Ferguson out on his lonely ranch might be interested; if so, he were supplied with a team of Santa Claus, he could drive in behind Wallace and Bruce, and make just as good an impression on the children as any other Santa, and it wouldn't cost the merchant \$2000 for the price which this peripatetic Santa requires to swoop down upon this town.

Thirty merchants at \$10 each would have furnished the required amount of \$300. However, after having an interview with the gentleman, and enjoying a friendly chat, your reporter left him to fight the battle of Santa with the important merchant.

He is a good and considerable experience in selling advertising space, board of trade membership tickets and memberships in this and that, another visit to work up enthusiasm for Santa's reception, not being sufficiently enthusiastic to spend a few hours in which we might have been looked at with cold codfish eyes and with that glint which seems to say—"now what are you after?"

We steer clear him, and Jack McDonald, at the Empire, figuring that would be a good starting point, but just at that time the license inspector or someone else on important business came along, and he was compelled to go into the details of the proposed visit.

The idea of giving the "kids" a Christmas community party is a good one, and if local merchants would like to enter the scheme, why not eat out in five dollars, buy the youngsters the things they'll enjoy—candy, nuts, oranges, a toy for each—and stage a real Christmas party in the community hall?

The \$500 or other hundred dollars spent in this way would bring a lot more fun and satisfaction than paying a bewhiskered gent to drop in from an airplane for a brief spell. The suggestion is a good one, for Santa Claus as well as the children.

### Coleman Caledonian Society

Coleman Caledonian Society held their regular meeting on Friday, November 25th. Mr. John Anderson and Mrs. E. R. Kennedy were elected to the positions of president and secretary-treasurer, respectively, to preside during the present term. Following the election, the grand raffle, prize winners being Mrs. S. B. Ryan and Mrs. Pryde. Mrs. E. Beart won the mystery prize.

**Right!**  
"So you can always spot a bachelor's apartment?"

"Yes; there's no chair under the telephone."

"She's a Good Jumper."

The woman traveller wondered whether she could board the sleeping car in the yards, and retire, ahead of the departure of the train.

"Can I get on No. 6 before it starts?" she asked.

The information clerk was more worn than she. "You'll have to, madam!"—Unidenified.

*In 1937, while Canadian Mines were on part time*

**Canada Imported  
Twelve Million Tons  
of Coal from Other  
Countries**

Had Canadian miners supplied an amount equal to one half of this imported coal, they would have benefited to the extent of approximately 50 days additional work throughout the year; Canadian railroad men would have had increased employment as well as all others engaged in handling and selling Canadian coal.

The agitation for subventions on Canadian coal must be maintained if Canadian mine workers are to have steadier employment. It is of vital interest to workers that they as well as mine executives continue to agitate for increased use of Canadian coal against Imported coal.
